## Designed in response to change

We're working more collaboratively in a variety of settings - but spending less time in each spot. We expect to be able to work anywhere and everywhere, and we need a chair sitting that can do the same.

## DESIGN IN QUALITY

While the technology has changed much about the nature of work, it hasn't changed how we all like to work in comfort. Rocee chairs are designed to deliver instant comfort from the moment you sit down.

# Rocee

Rocee is a new high-tech design chair which cover the locking created with elegant curve and modern smooth lines on the back and combined with high-class PA white plastic materials that to make general view in young and fresh. It is a good choice for task and conference space. We focus on the outstanding points specially as the mechanism, it is unique design and much different from traditional mechanism that to make seat and mechanism from two parts in one unit integration, support points cross over the three pivots look sharp and strong, functional application make users much intuitive to fit with cable handle what function they use, weight balance setting follow each different weights of user to have suitable tilting tension, people can find a fit tilt position as they need as three positions: tilt locking in control.
